# LIST OF CONTENTS FOR VOLUME 23, 1996

## INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 1 January–February

Contents

| | | |
|---|---|---|
| G.C. Papageorgakis and D.N. Assanis | 1 | A spray breakup model for low injection pressures |
| M.-H. Chun, B.-R. Lee and H.-Y. Nam | 11 | Theoretical and experimental investigation of the onset of slugging in horizontal stratified air-water countercurrent flow |
| M.-H. Chun and M.-G. Kang | 23 | Effects of heat exchanger tube geometries on nucleate pool boiling heat transfer in a scaled in-containment refueling water storage tank |
| D.R. Kabele, M. Sen and P.F. Dunn | 35 | Statistics of boiling in a capillary u-tube |
| N.S. Goel and F. Gang | 45 | A simple method for pulse-echo thermal wave imaging of arbitrary-shaped subsurface scatterers in heterogeneous materials |
| P.-H. Chen and Z.-C. Chang | 55 | An improved model for the single-blow measurement including the non-adiabatic side wall effect |
| A. Barletta | 69 | On forced convection in a circular duct with slug flow and viscous dissipation |
| W.Y. Cheng, C.C. Wang, Y.Z.R. Hu and L.W. Huang | 79 | Film condensaton of HCFC-22 on horizontal enhanced tubes |
| L.C. Chow, J.K. Zhong and J.E. Beam | 91 | Thermal conductivity enhancement for phase change storage media |
| T.-Y. Wang | 101 | Convective heat transfer between a moving cylinder and flowing non-Newtonian fluids |
| R.E. Spall | 115 | Unsteady mixed convection in horizontal ducts with applications to chemical vapor deposition processes |
| X.Y. Huang and C.Y. Liu | 123 | The developing flow in a channel filled with porous media |
| T. Elperin and G. Rudin | 133 | Thermoelasticity problem for a multilayer coating-substrate assembly irradiated by a laser beam |
| M. Lacroix and A. Joyeux | 143 | Coupling of wall conduction with natural convection from heated cylinders in a rectangular enclosure |
| Announcements | 153 | 4th World Conference on Experimental Heat Transfer, Fluid Mechanics and Thermodynamics |
| | 154 | Call for Nominations: The Nusselt-Reynolds Prize |

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 2 March–April

Contents

| | | |
|---|---|---|
| S. Ashforth-Frost and K. Jambunathan | 155 | Effect of nozzle geometry and semi-confinement on the potential core of a turbulent axisymmetric free jet |
| K. Chen | 163 | An alternative procedure for evaluating the surface heat flux of a turbulent boundary layer with an unheated starting length |
| I.H. Tavman | 169 | Effective thermal conductivity of granular porous materials |
| A.S. Franca and K. Haghighi | 177 | Adaptive finite element analysis of microwave driven convection |
| M. Oka and V.P. Carey | 187 | A unified treatment of the direct contact melting processes in several geometric cases |
| M. Krishnan and D.G.R. Sharma | 203 | Determination of the interfacial heat transfer coefficient h in unidirectional heat flow by Beck's non linear estimation procedure |
| S.C. Chen and N.T. Cheng | 215 | A simple model for evaluation of contribution factors to skin melt formation in gas-assisted injection molding |
| N. Onur | 225 | A simplified approach to the transient conduction in a two-dimensional fin |
| T.C. Chiam | 239 | Heat transfer with variable conductivity in a stagnation-point flow towards a stretching sheet |
| A.A. Kendoush | 249 | Theory of convective heat and mass transfer to fluids flowing normal to a plane |
| M. Song, A. Steiff and P.-M. Weinspach | 263 | The analytical solution for a model of direct contact evaporation in spray columns |
| H.-S. Kou and D.-K. Huang | 273 | Some transformations for natural convection on a vertical flat plate embedded in porous media with prescribed wall temperature |
| K. Wichterle | 287 | Colburn analogy for heat transfer in non-Newtonian liquids |
| T. Gjesdal | 293 | A note on the additive correction multigrid method |
| M.D. Mikhailov and R.M. Cotta | 299 | Ordering rules for double and triple eigenseries in the solution of multidimensional heat and fluid flow problems |

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 3 May–June

Contents

| | | |
|---|---|---|
| R.G. Keanini and C.A. Allgood | 305 | Measurement of time varying temperature fields using visible imaging CCD cameras |
| C. Beckermann and J. Ni | 315 | Simulations of sedimentation in globulitic alloy solidification |
| H. Ishikawa and P.A. Hobson | 325 | Optimisation of heat exchanger design in a thermoacoustic engine using a second law analysis |
| P.G. Tucker and C.A. Long | 335 | Numerical investigation into influence of geometry on flow in a rotating cavity with an axial throughflow |
| M. Rhazi, A. Mir, Z. Zrikem and G. Gousebet | 345 | The stability of free convection in a particle-fluid mixture with a free surface |
| W.-C. Chen | 355 | Effect of the cross-sectional shape design of a drill body on drill temperature distributions |
| A. Georgiou and K. Kupiec | 367 | Nonlinear driving force appoximations of intraparticle mass transfer in adsorption processes |
| P.S. Dutta, H.L. Bhat and V. Kumar | 377 | Modelling temperature distribution in cylindrical crystal growth furnaces |
| J. Gammon and J.A. Howarth | 387 | The inward soldification of cylinders with a slightly perturbed temperature distribution at the boundary |
| J. Gammon and J.A. Howarth | 397 | The inward soldification of spheres with a slightly perturbed temperature distribution at the boundary |
| R.M. Saldanha da Gama and M.L. Martins-Costa | 407 | Simulation of momentum and energy transfer in a porous medium nonsaturated by an incompressible fluid |
| M.N. Darbhe and K. Muralidhar | 417 | Natural convection heat transfer from a discrete protruding surface |
| I. Sauciuc, A. Akbarzadeh and P. Johnson | 427 | Temperature control using variable conductance closed two-phase heat pipe |
| L. Dehmani, K.S. Doan and C. Rey | 435 | Analyse spectrale du champ dynamique d'un panache turbulent rencontrant un milieu fortement stratifie |

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 4 July–August

Contents

| | | |
|---|---|---|
| G. Guglielmini, M. Misale and C. Schenone | 451 | Experiments on pool boiling of a dielectric fluid on extended surfaces |
| D. Schroeder-Richter, S. Yildiz and G. Bartsch | 463 | Effect of porous coating on critical heat flux |
| M.-H. Chun and C.-K. Sung | 473 | Onset of slugging criterion based on characteristics and stability analyses of transient one-dimensional two-phase flow equations of two-fluid model |
| A. Pinarbasi and A. Liakopoulos | 485 | On the influence of temperature and viscosity fluctuations on interfacial instability |
| A.N. Beard, D.D. Drysdale and S.R. Bishop | 495 | Predicting the effects of design parameter variations on major fire spread in a tunnel |
| E.Y. Goh and L.P. Chua | 505 | Effects of adverse pressure gradient on near wall length scale in Reynolds-stress model |
| T.K. Aldoss | 517 | MHD mixed convection from a vertical cylinder embedded in a porous medium |
| W.-J. Chang, W.-L. Dai and W.-L. Chang | 531 | The Reynolds number and Prandtl number effects on developing convection of vertical tube partially filled with porous medium |
| C. Liu and H. Chen | 543 | Visualization and numerical prediction of flow characteristics of double diffusive convection in a static crystallizer |
| M. Spiga and G.L. Morini | 555 | Laminar heat transfer between parallel plates as the limiting solution for the rectangular duct |
| R.F. Barron, X. Wang, R.O. Warrington and T. Ameel | 563 | Evaluation of the eigenvalues for the Graetz problem in slip-flow |
| A. El Biyaali, J.J. Roux and C. Inard | 575 | Sous-structuration et couplage de modeles reduits appliques aux transferts thermiques dans le sol |
| A. Degiovanni and J.C. Batsale | 587 | Contact périodique en regime etabli-resistances thermiques apparentes limites pour des durees de contact nulles et infinies |

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 5 September–October

Contents

| | | |
|---|---|---|
| K.J. Hammad and G.C. Vradis | 599 | Viscous dissipation and heat transfer in pulsatile flows of a yield-stress fluid |
| M. Nasiri and W.K. Van Moorhem | 613 | An investigation of heat and mass transfer in oscillating flows at high acoustic Reynolds numbers |
| N.E. Wijeysundera, J.C. Ho and S. Rajasekar | 623 | The effectiveness of a spiral coil heat exchanger |
| I. Nirdosh and G.H. Sedahmed | 633 | A mass transfer study of the diffusion controlled dissolution of cubical cavities under natural convection conditions |
| P. Razelos and B.R. Satyaprakash | 643 | Analysis and optimization of convective trapezoidal profile pin fins with internal heat generation |
| S.C. Saxena and S.S. Dewan | 655 | Heat transfer from a horizontal tube in a magnetofluidized bed |
| S. Shin | 665 | The effect of the shear rate-dependent thermal conductivity on non-Newtonian fluids on the heat transfer in a pipe flow |
| Z. Ilken and A. Erek | 679 | A correlation for planar solidification of water |
| I. Pop, T. Watanabe and H. Konishi | 687 | Gravity-driven laminar film flow along a vertical wall with surface mass transfer |
| T.-Y. Na and I. Pop | 697 | A note to the solution of Cheng-Minkowycz equation arising in free convection flow in porous media |
| I. Dincer, Y.A. Kilic and N. Kahveci | 705 | Heat transfer modelling of spherical particles subject to heating in a fluidized bed |
| I. Dincer | 713 | Determination of thermal diffusivities of cylindrical bodies being cooled |
| S. Yanniotis and D. Kolokotsa | 721 | Experimental study of water vapour condensation on a rotating disc |
| S. Shin and Y.I. Cho | 731 | Forced convection behavior of a dielectric fluid (FC-77) in a 2:1 retangular duct |
| J.C. Arderius, M.A. Lara and D.A. Tarzia | 745 | Experimental-numerical determination of thermal coefficients through a phase-change process |
| Announcements | 755 | Eurotherm Seminar No. 48- Pool Boiling |
| | 756 | ICHMT Symposium: Advances in Computational Heat Transfer |

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 6 October

Contents

| | | |
|---|---|---|
| J.B. Chung, W.-P. Baek and S.H. Chang | 757 | Effects of the spacer and mixing vanes on critical heat flux for low-pressure water at low-velocities |
| H.Y. Jeong and H.C. No | 767 | Modelling for post-dryout heat transfer amd droplet sizes at low pressure and low flow conditions |
| S.Y. Hu, Y.P. Chang, W.R. Jong and S.C. Chen | 779 | Effect of mold heat transfer on the curing reaction of epoxy molding compound during transfer molding |
| K.C. Leong, C.Y. Liu and K.H. Sun | 789 | Vapor pressure distribution of a flat plat heat pipe |
| S. Syrjälä | 799 | Further finite element analyses of fully developed laminar flow of power-law non-Newtonian fluid in rectangular ducts: Heat transfer predictions |
| S.P. Bhattacharya, T.F. Wall and R.P. Gupta | 809 | An analysis of the angular scatter measurement to determine the optical constants of coal and ashy materials |
| C.-H. Wang and J.-T. Chen | 823 | An experimental investigation of the burning characteristics of water-oil emulsions |
| J.C. Yang, W.M. Pitts, B.D. Breuel, W.L. Grosshandler and W.G. Cleveland | 835 | Rapid discharge of a fire suppressing agent |
| C. Gao and Y. Wang | 845 | A general formulation of Peaceman and Rachford ADI method for the *N*-dimensional heat diffusion equation |
| A. Campo and R. Villaseñor | 855 | Subregion of validity of the lumped-based model for transient, radiative cooling of spherical bodies to a zero temperature sink |
| I. Pop and D.B. Ingham | 865 | Flow past a sphere embedded in a porous medium based on the Brinkman model |
| A.J. Chamkha | 875 | Non-Darcy hydromagnetic free convection from a cone and a wedge in porous media |
| P. Chandran, N.C. Sacheti and A.K. Singh | 889 | Hydromagnetic flow and heat transfer past a continuously moving porous boundary |
| Z. Ilken and H. Gunerhan | 899 | An investigation about the relations between the results of heat conduction problems with and without phase change |

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 7 November

Contents

| | | |
|---|---|---|
| K. Ishida and Y.H. Mori | 907 | Surface tension of aqueous lithium bromide solutions containing 1-octanol as a "heat-transfer" additive |
| K. Medjani | 917 | Numerical simulation of the formation of brine pockets during the freezing of the NaCl-$H_20$ compound from above |
| A.V. Kuznetsov | 929 | Analysis of a non-thermal equilibrium fluid flow in a concentric tube annulus filled with a porous medium |
| M.T. Lee | 939 | On the mechanism of evaporation of water from a nonhygroscopic porous medium |
| M.-H. Chun, Y.-S. Kim and J.-W. Park | 947 | An investigation of direct condensation of steam jet in subcooled water |
| A.O.P. Leite, M.A. Ferreira and J.A. Carvalho, Jr. | 959 | An investigation of multiple jet acetylene flames |
| D. Gobin and R. Bennacer | 971 | Double diffusive natural convection in aqueous solutions near the density maximum |
| G. Ya. Aleshin | 983 | Thermoreactions between molten salts and water at high cooling rates |
| T.N. Wong and K.T. Ooi | 993 | Evaluation of capillary tube performance for CFC-12 and HFC-134A |
| T.N. Wong and K.T. Ooi | 1003 | Performace of a parallel-wire depth probe |
| H. Minhas and G.S.H. Lock | 1011 | Estimating the influence of Prandtl number on heat transfer in a bayonet tube |
| E. Figueira da Silva and R.M. Cotta | 1019 | Benchmark results for internal forced convection through integral transformation |
| H.-S. Kou and D.-K. Huang | 1031 | Possible transformations for natural convection on a vertical flat plate embedded in porous media with prescribed wall heat flux |
| S.S. Okoya | 1043 | Some exact solutions of a model nonlinear reaction-diffusion equation |

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1996 Volume 23, Number 8 December

Contents

| | | |
|---|---|---|
| M.-H. Chun, C.-K. Park and J.-W. Park | 1053 | An experimental investigation of critical flow rates of subcooled water through short pipes with small diameters |
| M. Kadja, J.S. Anagnostopoulos and G.C. Bergeles | 1065 | Study of wind flow and pollutant dispersion by newly developed precision-improving methods |
| J.-W. Park, W.-P. Baek and S.H. Chang | 1077 | Assessment of CHF correlations for internally heated cocentric annulus channels |
| W.-T. Tsai | 1087 | Effects of surfactant on free-surface turbulent shear flow |
| S. Kim | 1097 | Analysis of influence of physical parameters on vapor-liquid flow behaviour up to dryout in a heat-generating porous medium |
| S.H. Chang, Y.I. Kim and W.-P. Baek | 1109 | Derivation of mechanistic critical heat flux model for water based on flow instabilities |
| M. Arik, C.A.C. Santos and S. Kakaç | 1121 | Turbulent forced convection with sinusoidal variation of inlet-temperature between two parallel-plates |
| M.L. Martins-Costa | 1133 | A local model for a packed-bed heat exchanger with a multiphase matrix |
| S. Dost, M. Kimura and Z. Qin | 1143 | Diffusion mass transport in liquid phase epitaxial growth of semiconductors |
| M. Kiliç | 1151 | Flow and convective heat transfer in cylindrical reversed flow combustion chambers |
| H.-W. Wu and M.-C. Liu | 1163 | Experimental study of convective heat transfer response to relative humidity in source arrays |
| R.C. Aldredge | 1173 | A novel flow reactor for the study of heat-loss effects on turbulent flame propagation |
| S.A. Bekishev and A.A. Gubaidullin | 1181 | Empirical models for shear viscosity of polymer solutions and estimation of rheological parameters |
| C. Gao | 1193 | Accuracy of the general Peaceman and Rachford alternating direction implicit method |
| | 1201 | LIST OF CONTENTS FOR VOLUME 23, 1996 |
| | 1209 | AUTHOR INDEX TO VOLUME 23, 1996 |
